

Dear Colleagues

We are thrilled to host in Kraków the 3rd International Conference of Contemporary Pharmacy Challenges under the theme "Enhancing Pharmaceuticals through Interdisciplinary Research." This conference builds on the previous two, held in Wisła, Poland and Dortmund, Germany respectively. This time, it will coincide with the 100th anniversary of the Chair of Pharmaceutical Technology and Biopharmaceutics at Jagiellonian University Medical College in Kraków, Poland. To honor our traditions by looking into the future, we have expanded the conference's scope by including scientific panels on modeling and simulation in pharmaceuticals, emerging pharmaceutical technologies and dosage forms, colloidal delivery systems for small molecules, biological drugs and vaccines, and industrial issues and cases. We believe that bringing together scientists from various fields and countries will create a truly interdisciplinary platform for exchanging experience, knowledge and sparking brilliant ideas for scientific excellence. Wholeheartedly welcome to this unique event in our wonderful and magical city of Kraków.

3 day conference - 8 scientific panels

- Physicochemical characterization of amorphous systems
- Fundamentals of crystallization from amorphous phase
- Stability of amorphous systems
- Modelling and simulations in pharmaceuticals
- Solubility and/or dissolution improvement and methods
- Emerging pharmaceutical technologies and dosage forms
- Colloidal delivery systems for small molecules, biological drugs, and vaccines
- Industrial issues and cases
